# ABOUT US

**D**PPPL is a company established with aim to provide aesthetic solution to infrastructure project. It is our privilege to come up with a end to end solution company for Road Furniture and Highway landscaping. Our quality standards, Construction and project managements techniques is reflection of our business excellence. DPPL brings a fresh approach to integrated Infrastructure with an innovative, dynamic, highly motivated and enthusiastic team of t Engineers, Architects, Planners and Horticulturist who harness a great depth of industry experience and knowledge. We pride ourselves on staying informed of the latest industry thinking and trends through regular involvement in industry bodies, conferences and seminars. Our integrated team offer advice and solutions for designing, manufacturing and execution of products related to the entire system, rather than one item in isolation.

## WHY US !

DPPL delivers expertise and solutions across diverse range of infrastructural areas. Our engineering capabilities are grounded with innovation and superior project delivery. Our quality standards, construction and project management techniques are a reflection of our business excellence.

We are committed, energetic and agile; ensuring sustainable change is delivered in rapid, assured and cost effective manner,

We bring pragmatism to projects, blending theory and expertise in the latest technologies with a deep understanding and experience of the realities of our specialist sectors.

A detailed architectural rendering of a modern building at night. The building features a series of cantilevered balconies that create a dynamic, sculptural facade. The balconies are illuminated from within, casting a warm glow. The building is set against a dark sky, with other city buildings visible in the background. In the foreground, a street scene is depicted with cars and pedestrians, suggesting a vibrant urban environment.

# OUR SERVICES

DPPL brings a fresh approach to integrated transport with an innovative, dynamic, highly motivated and enthusiastic team of traffic engineers and transport planners who harness a great depth of industry experience and knowledge. We pride ourselves on staying informed of the latest industry thinking and trends through regular involvement in industry bodies, conferences and seminars.

We understand that transport needs are inherently linked to land use; the two cannot be understood in isolation. Our integrated team of transport and land use planners offer advice and solutions related to the entire system, rather than one item in isolation. Our solutions encourage active travel. We incorporate an understanding of economic and financial factors impacting on efficient system. Our team offers services that include:

- Active transport, bicycle and pedestrian advice
- Demand management
- Integrated land use, transport advice and transport studies
- Parking strategies, analysis and advice
- Public transport infrastructure and service advice
- Road safety audits and analysis
- Strategic route planning and feasibility studies
- Traffic engineering assessments and advice
- Traffic impact assessments, Traffic engineering
- Transport strategies
